

eSENSE Dashboards for Clinical Practices

Visualize Revenue Data · Analyze Practice Performance · Optimize Operations

Overview

Exploit the true potential of your revenue data with instant “dashboard” visibility to critical information and KPIs across the entire revenue cycle.

1. Instant graphical insight into key metrics and trends—all the data and metrics you need, all in one place;
2. Proactive analysis of critical revenue cycle data – standard metrics for collections, denials, A/R etc.
3. Streamline management reporting, minimize risks of noncompliance and optimize practice performance.
4. Rapid deployment – secure online solution with no IT installation or technical training requirements.
5. Standard process for fast data take-on and weekly updates – simple monthly subscription fee structure.

Clinical practices are increasingly challenged to deliver high-quality patient care within tighter financial constraints and increasing regulatory requirements. This means managing large pools of data from multiple financial and clinical systems to support rapid analysis and enhanced decision-making. NSE’s web-based eSENSE Dashboards provide clinical practices secure, instant access and insight across all areas of the revenue cycle enabling powerful drill-through analysis, streamlined reporting and more informed decision-making to optimize practice performance.

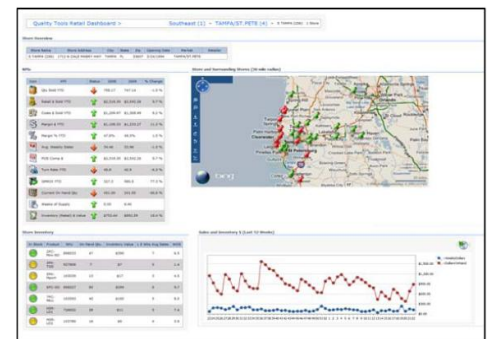

1. Instant visibility into critical revenue metrics

eSENSE Dashboards provide timely, accurate visualization across all areas of the revenue cycle. By blending historical and “real time” data, clinical practice managers can monitor key revenue metrics and interactively drill to details as issues arise or performance thresholds are exceeded. Rich, user-friendly visualization through graphs, maps and grids provide intuitive navigation, drill-down capabilities and links across multi dimensional views such as location, time-phase, specialty, provider, payer, financial class, department, procedure, patient and encounters.

2. Proactive analysis of revenue performance

Given the increasing complexity of revenue cycle management, the challenge is not only to turn revenue data into relevant business information but also to provide the tools that support rapid analysis for more informed decision-making. This includes, for example, the ability to pinpoint opportunities to improve revenue collections, decrease claim denials, streamline reporting, identify revenue cycle trends and enhance accountability with standard KPIs that directly impact clinical practice efficiencies.

3. Actionable insight to optimize operations

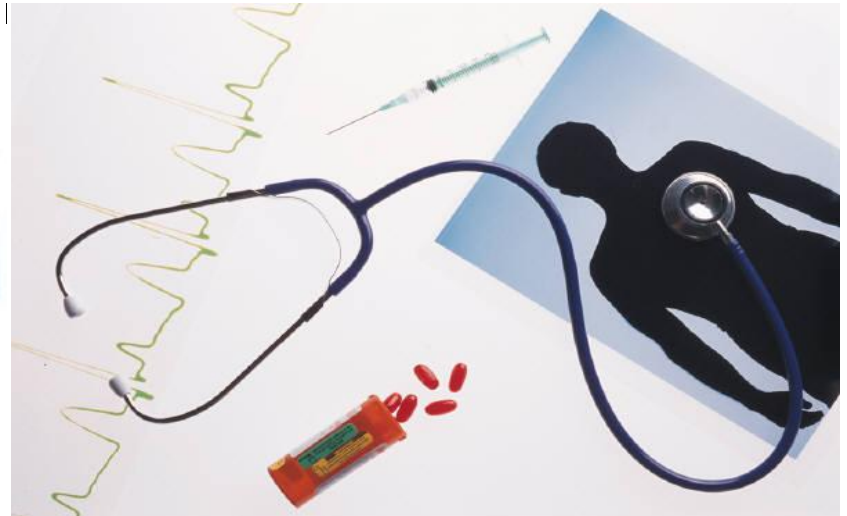

eSENSE Dashboards are designed to harness the information from multiple healthcare transactional systems to provide the actionable insight required to optimize operations. eSENSE Dashboards enhance existing clinical practice systems and are deployed as a 100% web-based, subscription solution with no IT installation or technical training requirements.

eSENSE Healthcare Dashboards

Powered by
eSENSE™

Leverage Existing Systems

eSENSE Dashboards are designed to harness the existing data which clinical practices have already invested in including clinical transactional systems and financial systems. By integrating data from disparate silos, users access all the information they need in one place.

Standard Microsoft Platform

eSENSE Dashboards exploit the power and flexibility of Microsoft's collaboration technologies; a platform widely used by healthcare providers. Adding eSENSE to this platform provides the capability to rapidly build business dashboards leveraging data from multiple systems.

Fast Deployment

eSENSE Dashboards are designed for fast deployment and do not require IT or technical expertise. NSE follows the "software as a service" business model with a monthly subscription fee and a standard process for site setup, initial data take-on and weekly data updates.

Privacy and Security

Data privacy and security are paramount to clinical practices. eSENSE Dashboards provide secure, role-based access to individual users or groups and are fully HIPAA compliant.

Take the Next Step

To learn more about eSENSE Dashboards, please visit us online at www.nse.com, email marketing@nse.com, or call +1 404.254.5491.

NSE is a Microsoft Gold Certified and managed partner providing value-add and vertical solutions based on Microsoft's collaboration platform. NSE's eSENSE solutions enable rapid creation of business dashboards leveraging data from multiple systems. All eSENSE products are designed for fast deployment to organizations of all sizes including hosted services for our vertical market solutions.
